This section will show you how to take data from any source such as our JSON file and present it as per the table above.

The code is long in places - don't worry. You've seen it all in previous sections so just understand the code line by line and you will be fine. Let's go!

Get the free Daily Team To-do list [here](#) to take your team to the next level!

Scrum To-do List

- To update list of requirements from daily scrums, emails and other sources
- To create requirements about
- To create sprint report for
- To keep up any information holding an sprint backlog (eg. When partly supplied or blocked)
- To make team members and task board are visible to team work
- To arrange meetings and team chat to coach any new or newly team members, product owners or stakeholders

NOTE: When it comes time to update your team's productivity, get them taking their own team and get them planned for the day! [Click on the Daily To-do List Checklist](#) so you can learn the steps you need to take to coordinate and communicate with your team every day! Get your Daily To-do List Checklist [here](#)!
